

## **PatienTree -“Catapult” Secured Fast File Transfer for Healthcare**

EMR success will require large data and image file transfers and quick retrieval. The data transmissions need to be secured, auditable, efficient, and easy to perform. Introducing the PatienTree “Catapult” value propositions:

High-speed, integrity rich, secure file transfer tool to replace FTP, 2-10 times faster

- Cross-platform compatible
- End to End Easy to Use “Drag & Drop” total solution for EMR file transfers, back up, business continuity, and disaster recovery applications

Can completely automate the file transfer process; concurrently encrypts, compresses and transmits over the public infrastructure, includes;

- Controlled, asynchronous compression
- Encryption and transfer extensibility to support large numbers of users
- Optimized mapping configuration
- Desktop and server components
- Role-level security access including “Secure Key Biometric”
- Rule set propagation
- Active directory enabled
- Scheduled Events for transfer tasks
- Robust audit capability (who, when, where, integrity statistics)
- Fault tolerance & Fail over
- Remote Administration

PatienTree and IQSwift™ Server, delivering the “Power to Care from Anywhere” and beginning to grow with you!
