

For Healthcare Applications & HIPAA Compliance

The PatienTree Software System for mobile data capture, wireless data transfer, and populating existing databases runs on Tablet PCs, Pocket PCs, Digital Pens and other data capture devices

- Physicians
- Home Health
- Hospitals
- Clinical Research Organizations (CRO's)

PatienTree can help healthcare providers meet HIPAA privacy & security requirements:

Signature Capture

Design a signature capture system to computer-enable your existing patient acknowledgement process

Interface & Integration

Interfacing PatienTree signature capture system with existing healthcare provider system

"On Demand" Retrieval

PatienTree provides convenient, "on demand" retrieval of signed electronic forms using standard PDF formats or web browser applications

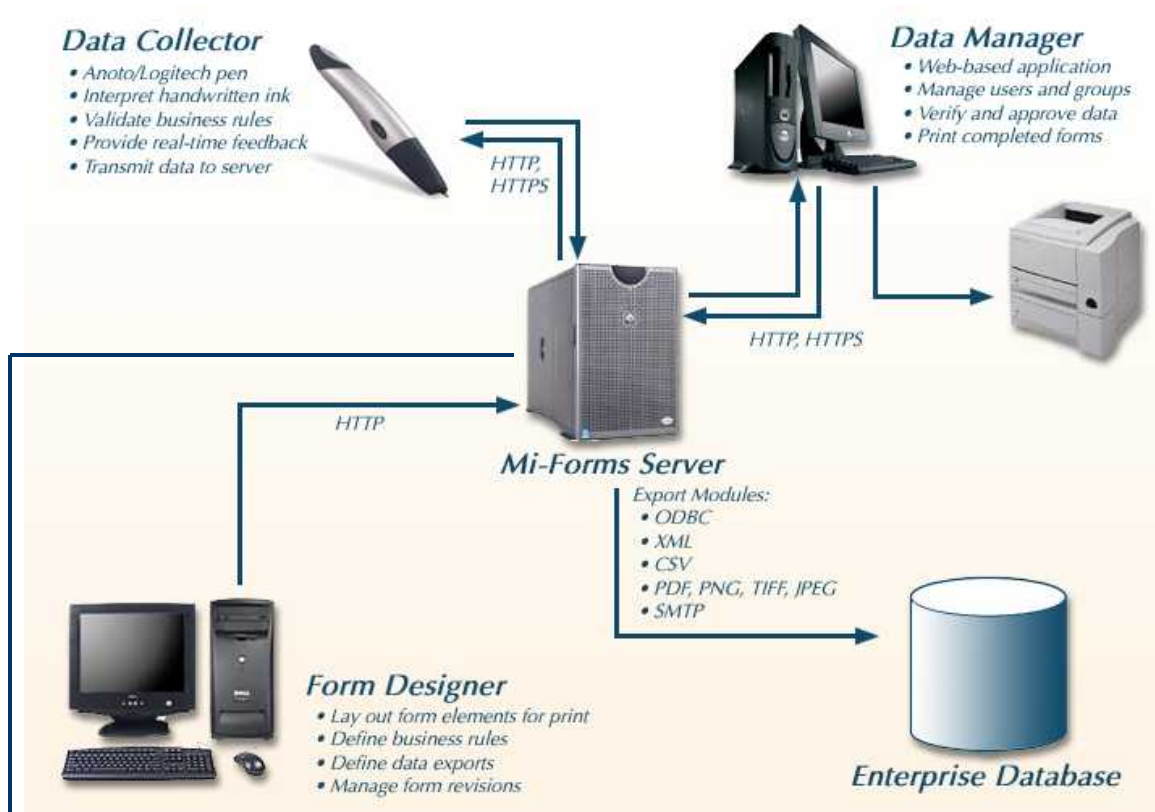

Security & Audit Controls

PatienTree provides full audit trails for the Who, What, When, and Why for all changes to & views of session data and system data
