

# PatienTree Mobile Forms *Enterprise Data Capture using the Logitech io Digital Pen*

The combination of Logitech®'s state of the art io Digital Pen technology and PatienTree Software system we provide enterprises a cost effective and efficient method of capturing data in the mobile environment.

If your organization is collecting data where mobility, handwriting, and accuracy are important, then the Mi-Forms solution using a Logitech io Digital Pen was built with you in mind.

## Five Simple Steps to Mobile Data Capture Empowerment!

### Install

Mi-Forms Software on your PC

### Convert

Your current data collection forms (or create new forms) with the Mi-Forms System

### Structure

Your data capture business rules based on your information needs

### Implement

The data collection and verification process of the Mi-Forms System in collecting the data you need for your enterprise

### Transmit

Collected data to your back end systems with Mi-Forms' easy to use data paths

## The Mobile-Forms System

### Save Time and Money

Automatic handwriting recognition reduces staff operation and data entry time

### Easy to Use

Continue with existing data capture procedures

### Efficient

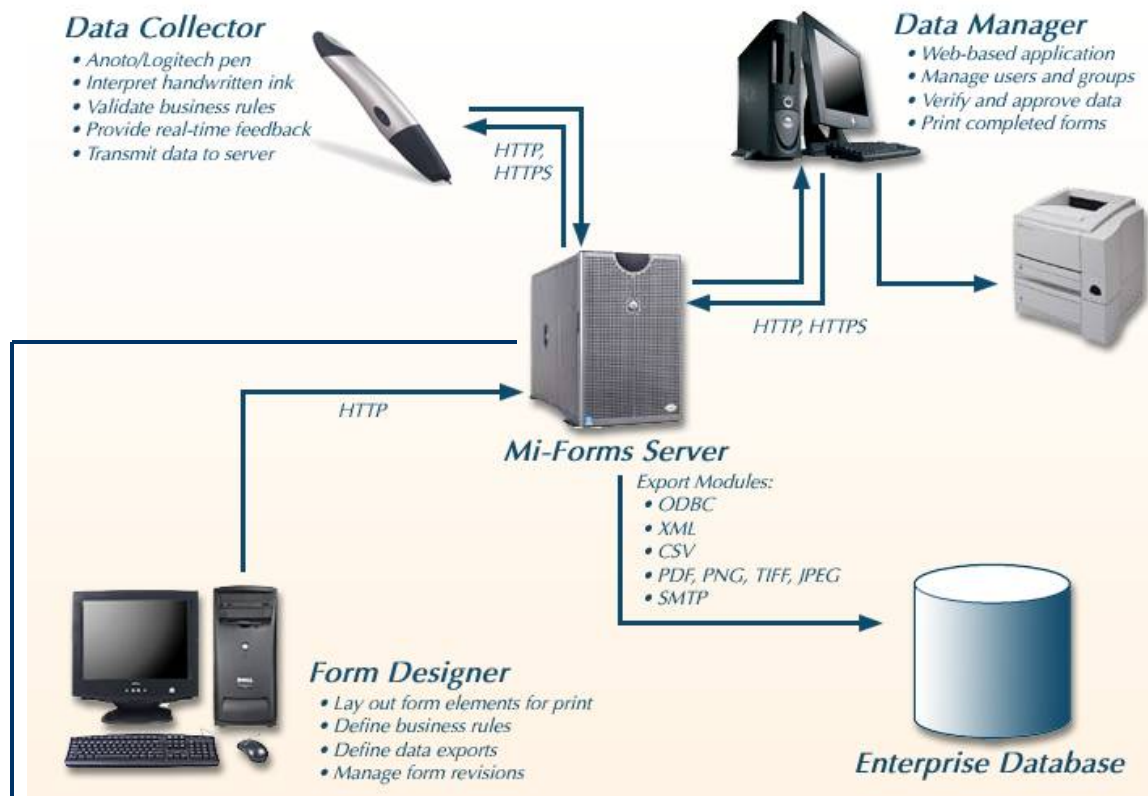

Paper form Processes are Computer Enabled

### Accurate

Business rules ensure consistent and complete information capture

### Flexible

Fast and secure wireless or end of shift data transfer

### The PatientTree Bedside/Mobile Terminal
