

PatienTree Mobile Forms *Enterprise Data Capture Applications on Tablet PC*

The combination of state of the art Tablet PC and PatienTree Forms Software, from Mi-Co™ empowers the enterprises with a cost effective and efficient method of capturing real time data in the mobile environment.

If your organization is collecting data where mobility, handwriting, and accuracy are important, then the Mi-Forms solution on a Tablet PC was built with you in mind.

Five Simple Steps to Mobile Data Capture Empowerment!

Install

Mi-Forms Software on your Tablet PC

Convert

Your current data collection forms (or create new forms) with the Mi-Forms System

Structure

Your data capture business rules based on your information needs

Implement

The data collection and verification process of the Mi-Forms System in collecting the data you need for your enterprise

Transmit

Collected data to your back end systems with Mi-Forms' easy to use data paths

The Mi-Forms System

Save Time and Money

Automatic handwriting recognition reduces staff operation and data entry time

Easy to Use

Continue with existing data capture procedures

Efficient

Paper form Processes are Computer Enabled

Accurate

Visual and audio feedback, coupled with business rules, ensure consistent and complete information capture

Flexible

Fast and secure wireless or end of shift data transfer
