- Enhancement of Healthcare HIPAA Compliance Initiative
- Reduction of Costs Associated with Providing and Obtaining Care
- Extension of a Patients “Normal Life” Routines into the Care Giving Facility
- Remote Visitation to and from the Bedside, from Anywhere in the World
- Bedside Entertainment and Internet Access

### The PatienTree “Trunk” Powered by Netilla

The PatienTree “Trunk” – Providing and Securing the delivery of healthcare information via access through the Internet. The “Trunk” provides fast and easy access to healthcare applications in three environments; Thin Client, Thick Client and Reverse Web Proxy. A rack mounted appliance which includes the power of 128bit encrypted SSL, a Digital Certificate, a Firewall and Web Server which is quick and easy to install.

### The PatienTree “Branch” Terminal Network - Online Real-time Data Access, Whenever and Wherever you need it, literally at your finger tips.

The PatienTree Terminals are uniquely engineered to act as “ubiquitous” delivery points for healthcare data systems and Patient entertainment services. One hi resolution display terminal for the Patient Internet access, Hospital Intranet services, Cable TV, and Entertainment. The “branches” are installed at the patients bedside, waiting rooms, lounges, nursing stations or on Mobile Carts. PatienTree empowers care givers to deliver critical health care data to physicians, nurses, and support staff, wherever and whenever it is needed. Mobilize your workforce, reducing the steps required to provide care, and always have information at your finger tips.

One of the most powerful aspects of the terminal is the ease of use. Touch screen and voice commands are available to the users. PatienTree software modules include Food Services, Patient Survey, On Line Gift Shop, Touch Screen Games and our Mobile Data Forms. PatienTree also offers a “Remote Visitation Center” which can serve telemedicine requirements and most importantly, keep patients connected to their families, friends, and loved ones, without the inconvenience of travel expenses, short notice planning, and interruption to their lives. Via the PatienTree Network, over a secured connection, remote visitation is just like being there in person.

### The “PatienTree Seeds”

The PatienTree “Seeds” are small footprint devices which include PDA’s (Palm Pilots™, Blackberry™, and pocket PC’s), standard PC Peripherals, Digitizers and even the Logitech I/O Pen™! Mobilize your workforce, eliminate paper and the need to image it. Begin to accomplish the Electronic Medical Record at the point of input. Our Mobile solutions require NO user training because they are an exact representation of your forms and operate with Pen and Paper. Powered by the technologies of Mi-Forms™, Consent forms, HIPAA Policy forms, Patient Registration, DNR’s, and Food Services Menu’s are just a few examples of data that can be captured at the point of input. Paper input, automatically stored as images and exported to ODBC, XML, or MS Jet, even as a simple email message.

Each of the PatienTree components offers significant stand-alone value and when implemented as a whole, creates a totally new patient care giver experience. PatienTree provides a competitive edge, revenue enhancements, reduced risk, increased safety and enhances the overall quality and timeliness of care giving.

“PatienTree” - The First Total Win/Win Healthcare Technology for Everyone Who is Integral to the Process, Delivered Quickly and Easily on Your Existing Infrastructure.

Empower your most important Assets; Physicians, Nurses, Support Staff, Administration, and Processes, most importantly improve the Patient experience.

PatienTree, Information at your finger tips, When and Where you need it most. Leverage your Power to Care, From Anywhere at Anytime.

Stay in Touch with Family & Friends
